

## Lab Quiz#2

5 Grades

90 minutes

-Design the Following form

---

Email

Password

Login

- Create a database called **Employee**
- Create a table called **user**. both columns (**UserName** and **Password**) are of type varchar[20].

<u>UserName</u>	<u>Password</u>
ali	123
fadi	abc
hadi	568

- When user click on Login and user name and password are correct a message will show up to user telling him **that you have loggedin successfully**. 2 grades
- If user or password are incorrect a message will show up **to user telling him that user name or password are not correct**
- If on o the fields are empty a message will show up telling the user to **fill the fields**
- User try catch statements to catch any SQL exception and close the connection one

**Good Luck**
